

Claire Knorr

Product Manager | 0-1 monetization platforms, cross-functional launches | [linkedin.com/in/claire-knorr](https://www.linkedin.com/in/claire-knorr)

WORK EXPERIENCE

Palo Alto Networks - Product Manager, Licensing and Activation

August 2025 - Present

- Built and scaled a 0-1 credit management platform to 9 cybersecurity products, 2 credit currencies, and 35+ offerings (subscriptions, SaaS activations, and bundles), unlocking new revenue streams for 200+ customers at 99.9% activation reliability
- Launched usage metering for credit products across 25+ activation event types, achieving 100% billing accuracy by positioning the credit platform as the activation orchestrator so every billable event is captured at the source
- Integrated generative AI into activation support, shipping an LLM feature that summarizes activation failures and proactively opens support cases, cutting MTTR by 4 days and manual case creation by 10%
- Led New Product Introduction and GTM for 3 launches, aligning 8 cross-functional teams (Engineering, UX, Finance, Pricing, etc.) on requirements, compliance, and architecture to bring each to market in 2 weeks
- Led execution of a product-led growth trial flow designed to replace a ~1-week approval process with instant activation, with automated trial value reports alerting Sales and GTM teams to follow up
- Cut activation-related support tickets from 10% to under 1% by redesigning onboarding across 3 products, reducing required inputs from 20 to 5 and saving 300+ non-technical admins roughly 1 hour per activation
- Conducted 20+ customer discovery interviews with network security admins, prioritizing pain points into 8 net-new roadmap features by severity and support volume, cutting time-to-activate by 15 minutes

Walmart - Product Manager Intern

June 2024 - August 2024

- Authored a PRD and presented findings to leadership, driving the shipment of new ML models and metadata inputs to measure inspiration-score effectiveness
- Defined 3 production metrics for a homepage inspiration score measuring above-the-fold personalization content, adopted by Data Science to evaluate content performance at scale
- Validated the inspiration score against 2 years of shopper click-through (CTR) data in Tableau, Looker, and Excel
- Partnered with Data Science, Business, and Merchandising to build a content prioritization framework guiding campaign and content decisions across 100+ annual campaigns

American Express - Software Engineer Intern

June 2023 - August 2023

- Led the migration of 5 shell-script workflows to Python, creating a compliance automation adopted org-wide that saved 2 hours of manual work daily and served as the proof-of-concept that greenlit the broader platform migration
- Built a React.js login authentication system to streamline workflow access for the Corporate Technology team
- Drove sprint planning as technical lead on the compliance automation, ensuring on-time delivery across engineering milestones

American Express - Software Engineer Intern

January 2023

- Redesigned the user interface for an internal banking tool used by thousands of employees daily, delivering a full front-end overhaul within a 3-week sprint using HTML, CSS, and JavaScript

EDUCATION

University of Maryland: College Park

May 2025

B.S. Information Science, Minor, Disability Studies - *Magna Cum Laude*

College Park, MD

- **Activities:** Resident Assistant, Welcome Desk Student Manager, Alpha Lambda Delta Honor Society, Omicron Delta Kappa Honor Society, Undergraduate Teaching Assistant
- **Awards:** 2023 & 2024 Grace Hopper Scholar, Division of Student Affairs 2024 Outstanding Student Employee Award Recipient, Department of Resident Life 2024 Outstanding Customer Service Award Recipient

SKILLS

Product Management: 0-1 product development, usage metering & credit-based licensing, generative AI/LLM integration, NPI ownership, roadmapping, customer discovery, PRD writing, GTM planning, executive presentations

Tools & Analytics: Tableau, Looker, Excel, Figma, Google Suite, Gephi, LLM prompt engineering

Languages: Python, HTML, CSS, JavaScript, MySQL, Shell Script, React.js
